Worth every penny. “I found this to be helpful from the very first chapter. I was able to apply the ideas to the very next test I took in nursing school and have found it changed the way I view nursing school. It breaks it down to the various types of questions asked and how to approach them. It teaches you to brush aside the distracting and unnecessary aspects of the questions and teaches you to hone in on what really is essential. It even helps you break down the dreaded ‘select all that apply’ questions. I highly recommend this book to any and all first-year nursing students.” —Suzanne Chick Amazing. “The FA Davis Test Success book is amazing. In lecture, we’re told how to deal with \"nursing\" questions but it can still be puzzling. The test success book is wonderful and gives you examples and explanations, and then a practice test to use the test-taking tips in and gauge your success.” —Nina, Durham Technical Community College Great Techniques To Know BEFORE Starting School. “...this has helped tremendously. It breaks down the types of testing questions and gives hints on how to process it and choose the most correct answer. As well as ways to calm yourself on the day of the test and ways to prepare for test day. If you have test anxiety this will definitely

help with calming your testing fears. I've read from several buyers of this book to read it before you start school and I definitely agree!" —J N Moore

Test-taking Strategies for Beginning Nursing Students

About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how you choose to build and add to it over time. Nursing is a living and vibrant practice that requires your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include: Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins! Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of mastering this content becomes apparent. Roof: Critical thinking and clinical reasoning, which is the thinking that is required by the nurse that completes the house and ties everything together. Skeletons in the closet: Every house has closets and some have a few skeletons in them! Incivility and men in nursing will be explored in detail!

THINK Like a Nurse!

Emphasizing research and evidence-based practice, it organizes material by body system instead of developmental stage, allowing faculty to teach pediatrics in integrated courses/short courses without redundancy. This edition includes a new chapter on genetic and genomic influences, more emphasis on culturally competent care, and new features that emphasize clinical reasoning and health promotion. Designed to help students bridge the gap between classroom and clinical situations, the book emphasizes health promotion and maintenance, growth and development, and family-centered care. 0133096238 / 9780133096231 Principles of Pediatric Nursing: Caring for Children Plus NEW MyNursingLab with Pearson eText -- Access Card Package Package consists of: 0132111756 / 9780132111751 Principles of Pediatric Nursing: Caring for Children 0133054292 / 9780133054293 NEW MyNursingLab with Pearson eText -- Access Card -- for Pediatric Nursing (24-month access)
