"Templates for Documentation in Occupational Therapy" is a guidebook for occupational therapists looking to optimize treatment time by streamlining the charting process. This book provides a collection of customizable templates for different types of documentation commonly used in hospitals, skilled nursing facilities, home health, and out-patient settings. It contains a wide range of templates that can be utilized for evaluations, general treatment encounter notes, frequently used therapeutic activities, discharge summaries, and more. Each template is designed to be user-friendly and adaptable to individual patients and various practice settings. Producing high quality documentation hinges on the ability to identify and articulate the interplay between underlying impairment, functional limitations, and specific OT intervention. However, the documentation process can often feel insurmountable due to the impractical amount of time and effort required to capture this essential information. Fortunately, Templates for Documentation in Occupational Therapy offers valuable tools for optimizing the documentation process, helping clinicians streamline their workflows and focus on providing high quality care to their patients, rather than spending hours on paperwork. It is an essential resource for students, new graduates, and experienced occupational therapists alike who want to enhance the quality and efficiency of their documentation."

As occupational therapy celebrates its centennial in 2017, attention returns to the profession's founding belief in the value of therapeutic occupations as a way to remediate illness and maintain health. The founders emphasized the importance of establishing a therapeutic relationship with each client and designing an intervention plan based on the knowledge about a client's context and environment, values, goals, and needs. Using today's lexicon, the profession's founders proposed a vision for the profession that was occupation based, client centered, and evidence based--the vision articulated in the third edition of the Occupational Therapy Practice Framework: Domain and Process. The Framework is a must-have official document from the American Occupational Therapy Association. Intended for occupational therapy practitioners and students, other health care professionals, educators, researchers, payers, and consumers, the Framework summarizes the interrelated constructs that describe occupational therapy practice. In addition to the creation of a new preface to set the tone for the work, this new edition includes the following highlights: a redefinition of the overarching statement describing occupational therapy's domain; a new definition of clients that includes persons, groups, and populations; further delineation of the profession's relationship to organizations; inclusion of activity demands as part of the process; and even more up-to-date analysis and guidance for today's occupational therapy practitioners. Achieving health, well-being, and participation in life through engagement in occupation is the overarching statement that describes the domain and process of occupational therapy in the fullest sense. The Framework can provide the structure and guidance that practitioners can use to meet this important goal.
